RE: Barvista Homes, Inc.

To Whom It May Concern:

Since 2006, I have worked with Barvista on several large-scale multi-dwelling projects, as well as several single-family projects. In the last year, I executed one of the largest scale modular contracts ever completed in the state, Cougar Canyon Resort Hotel, with Barvista.

In my experience, Barvista has a demonstrated track record of successfully completing large scale modular building projects, and custom single family projects. I currently have several potential projects with Barvista in my pipeline, including a show-home at my location.

I especially find that Barvista is a very progressive company understanding their specific areas of expertise and understands where that expertise stops. Barvista understands when to bring in a partner that can provide the necessary "outside the factory" expertise to make sure the project(s) get completed. Barvista is one of the few factories that understands that in order to make a large project successful, they have to have a partner that can support all the "up-front" design, coordination of all parties involved and get the modular units delivered, staged, set and completed. I am refreshed by their approach and their leadership in this area. Not many of their competitors understand this. Their competitors continue to create bad projects by just selling the modular units with no expertise to get the units completed. Barvista truly stands out in this area and it is a pleasure to work with the entire team.

Respectfully,

Rick Hagan
